

Flash Forward to the Future with the new NetApp® ASA Systems

When it comes to deploying dedicated SAN solutions for your most important workloads, you need guaranteed availability that you can depend on and storage that's easy to manage.

With NetApp and Meridian IT, the future of flash is available today with the new NetApp® ASA systems.

Unlock Unprecedented Performance, Reliability and Streamlined Efficiency

With NetApp® ASA systems, the pinnacle of all-flash SAN arrays, you are able to empower your organisation with lightning-fast storage performance

Whether you're managing critical databases, virtualised workloads, or high-demand applications, ASA delivers unmatched value, performance, reliability and security, so you can be sure your data is prepared for the future.

The NetApp® ASA family is now part of NetApp's portfolio based on NetApp ONTAP® data management software, so you can forget the complexity of bespoke infrastructure silos.

NetApp® ASA systems use the same API, CLI, and System Manager GUI that NetApp AFF and FAS arrays use. That means your team only needs to learn one set of skills and write one set of scripts. Any automation that you build for your unstructured data environment can seamlessly apply to your block environment too.

Designed as simple, high-performance SAN storage for mission-critical applications, you can achieve blazing-fast response times with ASA systems.

Be prepared for exceptional performance and industry-leading effective capacity with NetApp and Meridian IT.

Why Choose NetApp® ASA?

All-Flash Excellence

- ASA leverages cutting-edge all-flash technology, ensuring rapid data access and minimal latency.
- Say goodbye to sluggish response times and embrace the speed of ASA.

Unmatched Value and ROI

- The new **ASA C-series** offers all-flash performance at the price of hybrid flash, proving unmatched savings.

Simplified Management

- ASA integrates seamlessly with your existing infrastructure.
- Enjoy consistent data management, automation, and security across diverse environments.

Comprehensive Data Services

- Replication, cloud tiering, and data protection—ASA has it all.
- Optimize your storage strategy with NetApp's robust suite of services.

High Availability

- ASA's active-active architecture guarantees **99.9999% uptime**.
- Your critical workloads remain accessible even during maintenance or failures.

Ransomware Protection

- NetApp's integrated ransomware protection ensures your data remains secure.
- Sleep soundly knowing your critical information is shielded from cyber threats.

Lower Power Consumption

- ASA consumes up to **70% less power** compared to other all-flash solutions.
- Reduce your environmental footprint while boosting efficiency.

Remember, NetApp® ASA provides secure, high-performance block storage for critical data, ensuring your organisation's peace of mind!

Why Meridian IT

Meridian IT's expertise enhances the implementation of NetApp® ASA, support and management ensuring clients experience a worry-free journey into modern storage solutions.

Meridian IT and NetApp® ASA pave the way for simplified operations, continuous innovation, and unparalleled data security. As businesses embrace a data-driven culture, this partnership promises a worry-free journey into the future of flash storage. With NetApp® ASA, backed by the expertise of Meridian IT, the future of data storage is not just a promise—it's a reality available today.
